

# *LEATHER PANEL*

*Soft wall & ceiling covering*

**2017**

# Contents

Product features	P.002
Wave panel series	P.003-P.050
4D Jigsaw series	P.051-P.082
Wall tile series	P.083-P.090

3D Mosaic series	P.091-P.108
Certification	P.109
Soft moulding	P.110
Installation Guides	P.111-P.112

## 1.What's the Soft Leather Panel

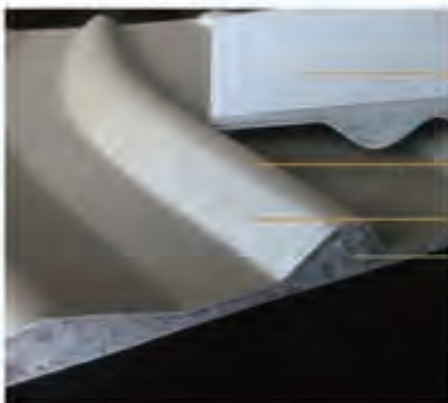

The panel is constructed by high quality PU Leather and high density memory PU foam, no back board and no glue. It can be cut by knife easily.

## 2.What's the features

- Light weight, Simple designs, Easy clean and installation, Safe
- No need high temperature and pressure to make the super 3D relieves. It's to make sure the long-life of the PU leather
- Fire Retardant and ZERO Formaldehyde emission
- Widely use on interior Wall and Ceiling

## 3.Why us

- We execute the strict management in QC.
- We never stop researching and creating any possible ideas. There are around 10 new designs each year.
- The price is not cheap, but not expensive. The quality, the service and the creation is our base.

- Back side is covered by PU leather too. It's to prevent the moisture from the wall in Spring time.
- Surface is covered by PU leather.
- Water proof coating
- Soft memory foam (Fire Retardant) inside

## Suitable for Wall & Ceiling in:

public areas	private areas	commercial areas
retail shop	home theatre	hotel
lounge	bedroom	cinema
window display	living room	theatre
kindergarten	wall and ceiling	KTV room
baby center	wardrobe	night club
circle column	door	restaurant
	ground mat	beauty salon
		cafe shop

### Zero - formaldehyde

It's perfectly realized and certified to ZERO formaldehyde emissions by SGS.

---

### Water and Moisture proof

Because of the excellent pu leather on the back and the bamboo charcoal fiber in the foam, it makes the panels waterproof and moistureproof.

---

### Fire retardant

The fire retardant performance reaches B in EN13501 and was certified by SGS. It also produces very low smoke, and it is the taste of bamboo charcoal after burning, not irritating.

---

### Sound proof

Because of the sharp 3D inclined block face and the high density foam inside, the sound will be faded and consumed gradually during the rebound between inclined faces.

---

### Soft and high rebound

The panel is composed of high density foam. Its high rebound means not ruffle, never deform. It has excellent effect of collision avoidance.

---

### Easy installation

No board on the wall, and no nail during installation, just use silicon to stick directly, free easy and fast.

---

### Secondary use

After period of time, if the panels must be removed, they can be torn off and installed on the other wall.

---

### Safety

Because of the light and soft, even if the wall paint falls off, the panels won't hurt people.

---

### Bend easily

The panel embodies the professional wisdom when there is the circle or square column or the corner.

---

### Acoustic absorption

The holes in the thick foam are to absorb the sound around.

Space: Sofa wall  
Item No: Lake Baikal  
Size: 600x800x15mm

## CHAPTER 1

### WAVE PANEL SERIES

Art in full bloom on the wall and ceiling, it's warm, it's tender, it's friendly, it's rich and colorful. Enjoying the silence, leading us to an endless aftertastes.

### 3D MOSAIC SERIES

Changing a kind of living style and a kind of fashion space,  
We are pushing to create a new Mosaic series. Not only to  
respect the traditional inspiration, but to innovate from the  
contemporary concept. We re-interpret the passion collision  
between the Mosaic art and the Soft leather !

## Moulding Cutting & Installation

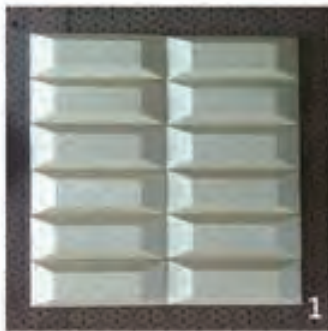

9040 Waver

9236 Highway

9468 Stoper

11545 Surfer

The length of the moulding is 2.9 meters.

1. Stick the panels on the wall, measure the size
2. The inner length of the moulding is the wall size. Cut by wooden-cutting machine on 45 degree
3. Brush the contact adhesive on both cutting sides
4. After few minutes, match the corners.
5. Drop silicon on the back of moulding, stick on the wall.

## Installation guide I

Make sure the surface of the wall is clean. For lime wall, please paint with a coat of latex. Square off the wall according to the size of panels.

Prepare the tools and materials as pictures. Apply the silicon on 4 corners and middle on the back of panel. Then, apply the Hot-melt glue on 4 corners.

Apply the first panel on the lined bottom middle position, then, go ahead with the neighbour panels by the same way. When applying on the wall, press a little bit for around 15 seconds to make sure of no gap between. When the size of the wall won't match the panels, cut the panels by utility knife as need.

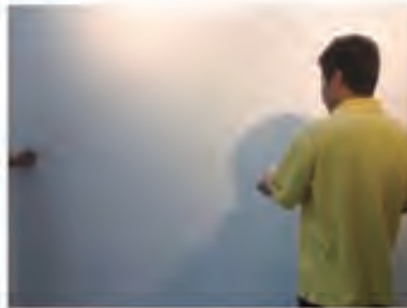

When there is outlet, measure the position on the panel and cut. Then put the inner box in the hole, cover the outlet.

## Installation guide II

**Tools:**  
Contact glue & Brush

**STEP 1:**  
Make sure the surface of the wall is flat and clean.  
Measure the outline and mark.

**STEP 2:**  
Refer to the panel size, measure and mark each unit on the wall

**STEP 3:**  
Brush the contact glue on the marked lines and in the middle of each cell

**STEP 4:**  
Brush the contact glue around the edge and middle on the back of each panel.

**STEP 5:**  
After 5-10 minutes of the step 4, apply the first panel on the bottom middle position. Then, go ahead with the neighbour panels until finish.
